THE HESTON 1373 AND 1376
If you're looking for commercial-grade side-pull disc mower conditioners, look no further than the 1373 and 1376 models with patented RazorEdge Header. The modular, heavy-duty design makes them super durable, virtually eliminating costly downtime. Not only do the wide-profile teeth offer increased gear-to-gear contact, but the entire drivetrain is designed to handle maximum load at all times. An industry exclusive, the RazorEdge Header's sealed bearings don't require constant lubrication, no matter the slope of the terrain. Should the worst happen, the gear spindle will shear outside the cutter bed, keeping contamination away from the gears.
